

# Intergalactic Securities & Management Corporation

## Why ISMC?

Intergalactic Securities has a serious financial toolbox including asset management and protection, enterprise organization and complex capital structure custom made for demanding operating environments that focus on long term multi-generation new wealth creation, nation building, revitalized community, general and specific industry renaissance.

Intergalactic Securities is dedicated to private companies, new issues and custom made solutions, prospectus, enterprise and industry development, and most of all The Individual. This leads to what the individual or even what the people in the enterprise envision, working towards that vision, those corresponding goals and mission, or even a better one that may exist or be developed.

This altruistic platform of ideals includes to augment, amplify, facilitate the cause and effect, to add and grow competence and capabilities, new ways of being, doing, achieving, greater awareness, something more comprehensive, yet simplifying the complex, making it easier, more understandable, more streamlined, practical, fluid, dynamic and alive. This means freedom, to create, build, experience and achieve, independence.

Intergalactic Securities streamlines initial organization, venture capital, multiple timelines, choice points, jurisdictions, entities, capital structure, products, services, prime contract, co-development, various financial and non-financial investment, development, acquisition and even contribution options, that are extremely useful for parallel transaction accounts.

Intergalactic Securities is without parallel or equal anywhere. It is significantly different than conventional stock markets, typical wealth management, public companies, and limited options, controlling, excessively regulatory and oppressive environments or people, entities, enterprise and organizations that have little or no vision, certainly not nation building vision, those kind of people that go out of their way to make life difficult for everyday people.

Dysfunctional social, political or economic environments are part of reality, however, there are many incredible things that can be done to minimize, neutralize or eliminate those elements. With Intergalactic Securities, we can go on to build something more civilized, purposeful and advanced, something with value, integrity, providence and excitement, real excitement, something to write home about.

All the great news that will follow is something you might eventually find in a newspaper owned and operated by the members of their community, to guarantee freedom of speech, organization and association, the essential arsenal of democracy. Having the capacity where you can find someone else, others like you, that does really care about individual freedom, prosperity and success, as this empowers the community, with a better quality of life with good solid paying jobs, careers and enterprise commerce. The present moment of right now and the future that offers opportunity, with these elements something much more than what would otherwise be never possible in the current operating environment, becomes reality.

Intergalactic Securities offers the kind of privacy, integrity, altruism, loyalty, purpose and focus on the enterprise, its mission and vast range of logistical resources required to make it happen. We can have that everyday confidence, experience and remarkable sense of self esteem, happiness and trust that things are really getting better, honesty in relationships, business and transactions are essential to that reality, otherwise everything self destructs. You may have noticed this already here and there around the world and even in Canada.

Even as the universe has tremendous magnitude and vast space and massive scale, Intergalactic Securities endeavours to offer and integrate dynamic, relevant and providential resources empowering individuals and enterprise to achieve their goals envisioned.

## Intergalactic Securities & Management Corporation

Of course, anyone being involved with Intergalactic Securities may already know that the universe is a really big place and we are not running it. However, as we accept more personal responsibility, learn and grow and express the best of who we are in the environment we are in, we step forward and advance in the direction of our dreams, our true hearts desire, hopefully our real purpose, we increase in power, we grow in character, we can create value and maybe do things that would not otherwise be possible, because we are more organized, we do a lot of thinking, but we also act with heart and soul. We may even do things that we have no explanation for, it is from the heart, the essence of our reality and what is important to us. We press forward and advance, even if we do not have the resources we think we need or want, we are doing, moving, being, creating, expressing the best of who we are. That's what's important. It is not any old quest, it is not all about money and power, or even fame and anything else. We can look at things from an incredible point of view. This will make whatever we endeavour, infinitely more successful and manageable, as we build great things together. The endeavours and enterprise is like an opportunity for expression and growth.

Naturally, here we promote creativity, productivity and profitability, in diverse industries, trades, professions, enterprise and entrepreneurs. This includes the providence of resources, infrastructure, ideas, both general and custom configured to quickly generate dynamic capabilities for any level of government or operational entities. We can work together to revitalize, empower, build and super charge the community, a municipality, program, projects, a group of people and the individual. The visionnaire and pro-active people are essential.

Ideas transform into various plans, design engineering, research and development, resource and personnel organization, manufacturing, marketing and distribution logistics, long term product development, service and secure supply lines and of course much more depending on the endeavour. Creativity, innovation, custom build, limited or even mass customization of high quality products and services, all these things add value, capability and a wealth of resources to what we are working on together. The big picture is made of many details.

Likewise, the initial idea, small or grand vision can have some important details in it, like the pieces in a puzzle, to render something tangible, real, worthwhile, something we can build with far into the future. As you may imagine, this Product of Canada, Canadianism, is where it is at. Canadianism will create common wealth, like what we started with, smarter more competent people, incredibly exciting, challenging and rewarding opportunity, jobs and careers that pay, that get you fired up with enthusiasm, energy, vitality and fire.

With Canadianism proposed by Intergalactic Securities, you will have more trades, engineering, production, enterprise creating along with new products, technology and services. Now this is great news as many people like to work at something they really enjoy and that is important, after all, fulfillment, job satisfaction and everyday happiness with Canadianism, people will be happier, healthier, more productive and successful.

Intergalactic Securities is dedicated to creative imagination and vision, investing energy and work with heart and soul, fulfilling enterprise development, a prospectus loaded with amazing details and vision, organized with capital structure and securities, resources, infrastructure and expertise, so we can transform thought into reality and build great things together.
